PRESS RELEASE – HOLD-TITE

For Immediate Release

Contact: Donna Butkiewicz

HOLD-TITE VEHICLE RESTRAINT

McGuire® Company recently introduced the HOLD-TITE™ vehicle restraining system as a means to restrain trailers during the loading and unloading process. The HOLD-TITE restraint system includes the restraint mechanism, full feature controls, inside and outside light communication package, and signage. The HOLD-TITE restraint is hydraulically powered. The unit seeks and finds the rear impact guard (RIG) of the trailer and “HOLDS” the trailer “TITE” to the loading dock during the loading process. The HOLD-TITE restraint is sold as a stand alone product or can be integrated into your loading dock operation.

McGuire, a division of Systems Incorporated®, is a leading manufacturer of hydraulic and mechanical dock leveling equipment. McGuire also provides complete loading dock solutions, including vertical storing levelers, truck restraints, truck levelers, bascule bridges, dock seals and shelters, dock lights, overhead doors, communication packages, control panels, safety barriers, and maintenance/service packages. For more information on McGuire and its products call 1.800.624.8473.
