PRESS RELEASE – INTEGRATED CONTROLS

For Immediate Release
Contact: Donna Butkiewicz

INTEGRATED CONTROL PANELS ENHANCES SAFETY AND PRODUCTIVITY AT THE LOADING DOCK

McGuire® Company has increased its capabilities with the introduction of a new line of “integrated control panels.” McGuire’s new line of control panels enables them to place dock leveler, vehicle restraints, door controls, dock lights, disconnects and other related equipment found in the loading dock area into a single “integrated control panel.” A single power feed can be converted into individually required voltage and phase requirements. Each individual piece of equipment can then be integrated into a customer directed sequence of operation to enhance safety and productivity at the loading dock. All panels are designed and build in McGuire’s own U.L. panel shop.

McGuire, a division of Systems Incorporated®, is a leading manufacturer of hydraulic and mechanical dock leveling equipment. McGuire also provides complete loading dock solutions, including vertical storing levelers, truck restraints, truck levelers, bascule bridges, dock seals and shelters, dock lights, overhead doors, communication packages, control panels, safety barriers, and maintenance/service packages. For more information on McGuire and its products call 1.800.624.8473.
