PRESS RELEASE – WEATHERGUARD 1600 SERIES

For Immediate Release
May 8th, 2009

Contact: Tabettha Wolfe

WEATHERGUARD HEADER PROVIDES PROTECTION TO INCLEMENT WEATHER

Fairborn® WeatherGuard 1600 Series™ is available as a complete unit or can be retro fitted to existing seals and shelters. WeatherGuard 1600 Series is ideal when the drive approach is sloped towards the dock opening causing rain water to funnel into the dock area affecting employee comfort and damaging cargo. The structurally supported rigid head member is translucent allowing natural light into the loading operation. A unique spring loaded, foam filled, pivoting head member ensures a watertight seal at the top of the vehicle.

Headquarters in Upper Sandusky, Ohio, Fairborn USA Incorporated is the leading manufacturer of dock seals, shelters, and custom dock enclosure products. For more information on Fairborn and its products visit www.fairbornusa.com.
