## **McGuire Introduces the TPR™ Vehicle Restraint**

**For Immediate Release**

**Monday, March 09, 2015**

Germantown, WI – McGuire®, a division of Systems, Incorporated announced the introduction of a new vehicle restraint to their loading dock line. The TPR™ truck positioned vehicle restraint is designed to automatically position itself and secure a trailer's rear impact guard (RIG) reducing the likelihood of premature trailer pull out.

To set the TPR vehicle restraint apart is an advanced communication system within the NEMA 12 control panel. The three light system provides a safe and efficient loading dock environment by establishing a clear line of communication between the truck driver and dock attendant.

The TPR offers many unique features:

- Internal and external signage and LED lights
- Exclusively designed gear motor that keep hook continuously engaged
- Restraining force in excess of 30,000lbs
- Low profile 9" carriage with service range of 9"-27" off grade
- Control panel offers keyed by pass/override switch as standard

McGuire, a division of Systems Incorporated, has provided the highest quality, most reliable products and services to its customers, for more than 50 years. McGuire offers a comprehensive line of dock levelers, vehicle restraints, dock seals and shelters, and accessories. More product information may be found at the company's website, [www.wbmcguire.com](http://www.wbmcguire.com).
