PRESS RELEASE – CENTRAPOWER

For Immediate Release
May 8th, 2009

Contact: Tabettha Wolfe

CENTRAPOWER LOWERS INITIAL BUILDING COST

Systems Incorporated®, manufacturer of Poweramp® and DLM® loading dock equipment has broadened its capabilities by introducing CentraPower® as a means to reduce the complexities and costs associated with new loading dock installations. CentraPower can reduce the number of hydraulic pumps, disconnects and associated power feeds by a factor of 10 to 1 which can produce “six figure” savings on large size distribution projects. In addition, locating the hydraulic power source in a convenient location inside the building creates a cleaner access and simplifies the maintenance process. CentraPower standard offering incorporates full back up pump and motor system to assure 100% up time.

Systems Incorporated® is a manufacturer of Poweramp, McGuire®, and DLM hydraulic and mechanical dock leveling equipment. Systems, Inc. also provides complete loading dock solutions, including vertical storing levelers, truck restraints, truck levelers, bascule bridges, dock seals and shelters, dock lights, overhead doors, communication packages, control panels, safety barriers, and maintenance/service packages. For more information on Systems Incorporated® and its products call 1.800.643.5424.
