Intelligent Dock Management

SCHEDULING &
CHECK-IN

DOCK
& YARD

DATA &
VISIBILITY

HARDWARE +
SOFTWARE

myQ Enterprise is the only connected hardware/software solution that streamlines driver scheduling, simplifies check in, and provides real-time communication. Automate loading dock assignments and processes with meaningful data insights & end-to-end visibility to transform your logistic operations.

Digitize. Automate. Optimize.

Scheduling & Check-In

Appointment Scheduling

Make the most of your drivers' on-site time. Schedule trailers at optimal times and identify load types to streamline the process upon arrival.

- Avoid backups
- Reduce time spent in the yard

Digital Check In / Check Out

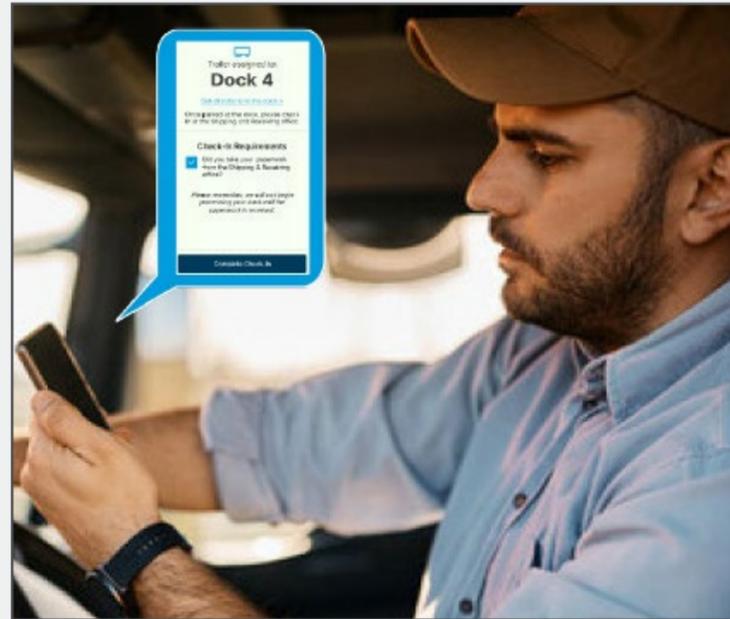

Leverage myQ Enterprise's mobile platform or smart kiosk at the gate to ensure a fast and accurate check-in experience.

- Eliminate paper-based processes
- Minimize manual-entry errors

Dynamic Dock Assignment

Leverage a smart rules engine within myQ Enterprise to automate the dock assignment process based on carrier information and load details.

- Optimize dock assignments
- Reduce trailer dwell time

Dock & Yard

Mobile Driver Communication

Connect drivers via mobile with dock updates and clear instructions on exactly where they need to be so they can get there as quickly as possible.

- Streamline onsite traffic flow
- Give visibility to drivers

Smart Dock Management

Get a view of your entire loading dock and yard from one platform. Monitor trailers onsite, manage loading activity, and receive alerts of inefficiencies or safety concerns at your docks.

- Improve trailer turn times
- Reduce detention fees

myQ | Enterprise

Data & Visibility Intelligent Dock Management

Understand What Happens With Every Dock Session

Review Operations & Performance Reports

Analytics That Power Productivity

Machine learning is applied to access-point data to optimize your logistic operations. It lets you know what is working efficiently and what isn't.

- Transform logistics
- Decrease operational expenses

Seamless Integrations

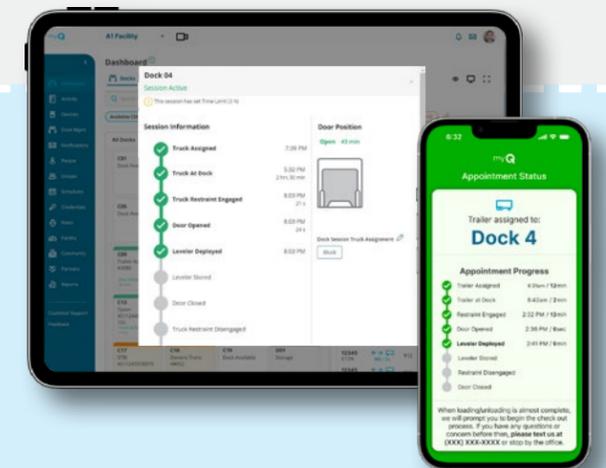

Integrate myQ Enterprise with your warehouse management system and other existing software solutions. These integrations ensure you have complete visibility across the facility.

- Share data across platforms
- Organize accurate information

Real-time Updates and Visibility

Instead of relying on sticky notes and emails, keep your guards, receiving management, and facility managers on the same page with live updates and instant communication.

- Maximize efficiency
- Enhance internal communication

Communicate Trailer Session Status in Real-Time

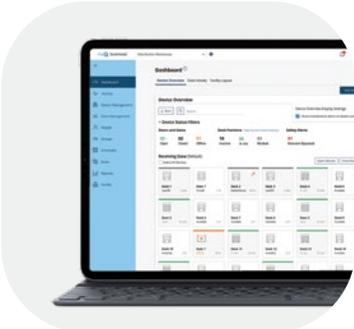

Digitally Transform
your Logistic Operations

Real-Time Data
is the future of logistics and dock management

The Only Connected Hardware/Software Dock Management Solution

myQ Enterprise's comprehensive suite of features will help you modernize operations across your facility's inbound and outbound logistics.
